

A compact Emacs control-key cheat sheet (JB – 2022/08/29)

Note: <Ctrl>-x means press the <Ctrl> and x keys simultaneously, for example.

Character strings in ‘‘quotes’’ should be typed at the minibuffer prompt. (The minibuffer is the space below the bar with the filename.)

files	read a file from disk	<Ctrl>-x <Ctrl>-f
	save a file to disk	<Ctrl>-x <Ctrl>-s
	exit the file you’re editing	<Ctrl>-x <Ctrl>-c
searches	search forward	<Ctrl>-s
	search backward	<Ctrl>-r
killing	kill a line	<Ctrl>-k
	yank last thing killed	<Ctrl>-y
replacing	replace string	<Alt>-x ‘‘replace-string’’
	query replace	<Alt>-x ‘‘query-replace’’
	stop query replace	<Ctrl>-x
goto	goto line	<Alt>-x ‘‘goto-line’’
	goto top of file	<Ctrl>-[<Shift>-<
	goto bottom of file	<Ctrl>-[<Shift>->
	center window on current line	<Ctrl>-l
split	split window vertically	<Ctrl>-x 2
	split window horizontally	<Ctrl>-x 3
	revert to single window	<Ctrl>-x 1
minibuffer	string completion	<Tab>
	abort operation	<Ctrl>-g
